Scope and limitations

This automated report identifies findings from supported rules on the HTML pages and states actually tested. It does not detect every accessibility barrier or establish WCAG or ADA compliance. Documents, captions, image-description quality, keyboard and screen-reader interactions, protected content and complete user journeys require additional assessment. Best-practice recommendations are separate from WCAG A/AA findings. Untested resources and checks requiring review are not passes or failures. This is not a legal audit, legal opinion or compliance certification; results are informational only.

Executive summary

Wiaerial was scanned across 38 public pages. The automated review found 0 critical, 0 major, and 0 minor issues, with 3 separate best-practice or supplemental recommendations. This report is structured so organizational leaders can understand current exposure quickly while the website team gets exact page-level fixes to work from immediately.

What to do first

- Review the scope of each automated check; no finding does not establish accessibility.
- Work through any manual-review rows with your web developer, IT team, or accessibility specialist.
- Re-scan after fixes to confirm the highest-risk issues are resolved.

Mapped to your compliance checklist

Website | Homepage and primary pages audited

Status: PASS

38 pages scanned with automated checks.

Forms | Automated form checks (interaction not verified)

Status: NEEDS MANUAL REVIEW

4 forms detected. Keyboard operation, validation, errors and successful submission require manual testing.

Documents/PDFs | Document inventory and automated PDF/UA validation

Status: FAIL

1 document URLs inventoried. Automated PDF/UA results: 0 passed, 1 failed, 0 could not be tested. These are document-standard checks, not ADA certification; human review remains required.

Videos | Videos have captions/transcripts

Status: NEEDS MANUAL REVIEW

13 video embeds require caption verification.

Technical WCAG | Technical WCAG checks

Status: PASS

0 technical issues found.

For informational purposes only. Not a legal compliance certification.

Critical Issues

0 ISSUES

No Critical Issues were detected during this automated scan.

Major Issues

0 ISSUES

No Major Issues were detected during this automated scan.

Minor Issues

0 ISSUES

No Minor Issues were detected during this automated scan.

Document validation results

Automated PDF/UA checks: **0 passed, 1 failed, 0 could not be tested**. These results do not replace human accessibility review.

<https://datcp.wi.gov/Documents2/UAVFactSheet2023.pdf>

Status: AUTOMATED PDF/UA CHECKS FAILED

- PDF/UA-1 validation profile: 7 rules failed (39 failed checks); 99 rules passed.
- Human review is still required for meaningful alternatives, reading order, table usability, contrast, form interaction and screen-reader usability. Automated PDF/UA results are not ADA/WCAG certification.
- ISO 14289-1:2014 §5, test 1: The PDF/UA version and conformance level of a file shall be specified using the PDF/UA Identification extension schema (1 failed checks). Example: root/document[0]/metadata[0](3 0 obj PDMetadata)/XMPPackage[0]: The document metadata stream doesn't contain PDF/UA Identification Schema
- ISO 14289-1:2014 §7.21.4.2, test 2: If the FontDescriptor dictionary of an embedded CID font contains a CIDSet stream, then it shall identify all CIDs which are present in the font program, regardless of whether a CID in the font is referenced or used by the PDF or not (1 failed checks). Example: root/document[0]/pages[0](204 0 obj PDPAGE)/contentStream[0]/operators[11]/font[0](PGQXIK+ArialMT)/DescendantFonts[0](PGQXIK+ArialMT): A CIDSet entry in the Font descriptor does not correctly identify all glyphs present in the embedded font subset
- ISO 14289-1:2014 §7.3, test 1: Figure tags shall include an alternative representation or replacement text that represents the contents marked with the Figure tag as noted in ISO 32000-1:2008, 14.7.2, Table 323 (13 failed checks). Example: root/document[0]/StructTreeRoot[0](7 0 obj PDStructTreeRoot)/K[0](8 0 obj SESect Sect)/K[1](192 0 obj SEArt TextBox)/K[0](122 0 obj SEFigure Figure): Figure structure element neither has an alternate description nor a replacement text
- ISO 14289-1:2014 §7.18.1, test 2: An annotation (except Widget annotations or hidden annotations, or those having rectangle outside the crop-box) shall have either Contents key or an Alt entry in the enclosing structure element (11 failed checks). Example: root/document[0]/pages[0](204 0 obj PDPAGE)/annots[0](68 0 obj PDLINKAnnot): Link annotation whose hidden flag is not set and whose rectangle is not outside the crop-box has neither Contents key nor an Alt entry in the enclosing structure element

- ISO 14289-1:2014 §7.1, test 9: The Metadata stream in the document's catalog dictionary shall contain a dc:title entry, where dc is the recommended prefix for the Dublin Core metadata schema as defined in the XMP specification, which clearly identifies the document (1 failed checks). Example: root/document[0]/metadata[0](3 0 obj PDMetadata)/XMPPackage[0]: Metadata stream does not contain dc:title
- ISO 14289-1:2014 §7.1, test 10: The document catalog dictionary shall include a ViewerPreferences dictionary containing a DisplayDocTitle key, whose value shall be true (1 failed checks). Example: root: ViewerPreferences dictionary is not present in the document Catalog, or DisplayDocTitle key is set to false or is not present in the ViewerPreferences dictionary (ViewerPreferences = null, DisplayDocTitle = null)
- ISO 14289-1:2014 §7.18.5, test 2: Links shall contain an alternate description via their Contents key as described in ISO 32000-1:2008, 14.9.3 (11 failed checks). Example: root/document[0]/pages[0](204 0 obj PDPPage)/annots[0](68 0 obj PDLinkAnnot): A link annotation does not include an alternate description in the Contents key

For informational purposes only. Not a legal compliance certification.

Items that still need human review

☐	Alt text quality	Found 0 image-alt findings to verify.	Automation can detect whether alt text exists, but not whether it accurately describes the image.
☐	Caption accuracy	Found 13 videos requiring caption review.	Automation can detect video embeds, but caption quality and accuracy require human review.
☐	Keyboard, screen reader and interaction coverage	Public pages only. Protected content was not scanned.	Test navigation, focus, forms, dynamic selectors, alternate media, zoom/reflow and full customer journeys. This crawl does not exercise every interactive state.
☐	Login-gated content	Public pages only. Protected content was not scanned.	Authenticated areas were not scanned in this public crawl and need separate manual testing.

Board-ready summary

Category	Issues Found	Status
Website	0	PASS
Forms	0	NEEDS MANUAL REVIEW
Documents/PDFs	0	FAIL
Videos	0	NEEDS MANUAL REVIEW
Technical WCAG	0	PASS

This audit was conducted on September 24, 2026 covering 38 public pages for Wiaerial. The automated scan identified 0 accessibility findings, prioritized by severity so the organization can address the highest-risk items first and then validate remaining content through follow-up manual review.

Best-practice and supplemental recommendations

landmark-complementary-is-top-level — <https://www.wiaerial.com/services/real-estate>

Aside should not be contained in another landmark. Ensure the complementary landmark or aside is at top level
